

A SHARED UNDERSTANDING OF YOUR DATA

Your data should move at the speed of the business.

Ziggurat turns a fragmented data estate into a **living, trusted source of truth** - so the answers that shape operations, board packs and investment decisions are ready when the conversation starts.

1

DAY TO A MAPPED, UNDERSTOOD DATA LANDSCAPE

FROM SCATTERED DATA TO SHARED INTELLIGENCE

No more rebuilding context, reconciling conflicting numbers, or waiting days to prepare the next decision. **Ziggurat preserves what your organisation learns and puts it to work every day.**

Four operational shifts

BEFORE / WITH ZIGGURAT

DATA LANDSCAPE AND DISCOVERY

BEFORE

Weeks of specialist effort to piece together hundreds or thousands of disconnected tables and systems.

WITH ZIGGURAT

A clear data landscape in a day, ready to reveal relationships, meaning and commercial opportunity.

KPI CONSISTENCY AND CONTEXT

BEFORE

Different teams arrive at different answers, while board-pack numbers take days to assemble and validate.

WITH ZIGGURAT

Shared definitions and accumulated context keep answers consistent, current and progressively more useful.

COLLABORATION AND WORKFLOW

BEFORE

People copy data and responses between AI tools, chat channels and email, leaving knowledge scattered.

WITH ZIGGURAT

An AI teammate meets teams in their existing conversations, so questions, insight and decisions stay connected.

SECURITY AND ACCESS

BEFORE

Access, connections and individual AI instances are managed as separate, difficult-to-govern exceptions.

WITH ZIGGURAT

One governed plane gives every team trusted access without compromising control or accountability.

A living semantic understanding, built for the decisions your business makes next.

Rescan daily or on demand as your data changes. Each new source, question and validated KPI makes the shared understanding stronger.
